- ✓ Information Management/Privacy Awareness Training Program
- ✓ Virtual Security and Privacy Officer Services

Cyber Security, Data Privacy, Forensics Solutions That Move Your Business Forward.

The foundation cyber security, data privacy, and forensic solutions for TruSec is based on the premise that information management is a business issue - not just an IT issue.

As businesses collect growing amounts of personal information, process and system vulnerabilities must be understood and managed. The risks are HUGE and can include loss of data, loss of revenue, or damaged reputation. As a firm comprised of experienced private sector security and privacy experts, TruSec understands how to support the achievement of high proficiencies in information management among its clients.

TruSec applies an integrated approach to cyber security and privacy solutions in order to leverage the capacities of limited financial resources.

TruSec and its clients work collaboratively to respond to changing operational needs for balance between benefits and cost for operations of all sizes.

Cyber Security - Delivering leading-edge, detail-oriented, and custom-designed security solutions, TruSec not only assesses risk, but also provides you actionable means to effectively address those risks. Our team of consultants guides you through the process of adhering to federal and industry-specific compliance standards and regulations, while helping you mitigate risks using our integrated, proven, and reasonably priced security services and solutions.

Data Privacy - TruSec brings global experience to the table - in understanding technology, the regulatory maze, risks and controls. Our team can work with yours to build and maintain an integrated global framework for data protection, privacy and compliance. Using a scalable, risk-based approach, we'll help you determine what needs to be secured and how to do it.

Forensic Services - Our team of specialists can tackle any crisis: corruption, fraud, cyber-crime, contract disputes, compliance, insurance claims, regulatory investigations, and so on. We're your trusted advisor, your expert witness, your investigator and your representative in mediation and arbitration.
