

EVOLVE YOUR CYBER SECURITY MODEL:

FROM A REACTIVE APPROACH TO MANAGING THE THREAT LIFECYCLE.

Cyber Security threats are growing in number, becoming more complex, and are having a significant impact on organizations throughout the world.

Did you know that, on average, a Cyber Security breach goes undetected for over 140 days? Your data is worth money! And, the sophisticated lengths taken to exfiltrate data require a paradigm shift in how we approach Cyber Security.

TruSec Consulting takes these threats seriously! Rather than purely trying to build the strongest walls and widest moats, we can help to develop a holistic approach that incorporates people, processes, and technology necessary to optimize your company's security posture and minimize its risk.

Most breaches occur under the gatekeeper's watch. Nowadays, workplace personnel are required to wear multiple hats during the work day. The face of your company meets vendors, visitors, and delivery people daily; it's up to you to spot potential problems, identify red flag behaviors, prevent breaches of security, and act with confidence and authority when these situations arise. The ability to know when and how to react is imperative!

TruSec hosts powerful eye-opening workshops that will help you discover a variety of tools, techniques, and strategies to better secure your organization. TruSec representatives will share preparation and prevention techniques to reveal ways to tight up possible weaknesses in procedures that may be leaving your company and employees vulnerable to outside negative influences.

TruSec Consulting can teach you more about a lifecycle approach to optimize your Cyber Security posture, manage Cyber Security threats, and plan for rapid and effective
